Industrial Safety Management

Guardian employs the
Health, Safety and Environment system

Safety and Health

They have been defined as the priority assignment of the Company. We are taking a lead in the establishment of a safe and healthy society through continuous efforts on the improvement and prevention of safety accidents. We will play a leading role in improving the safety and health of a society by developing our competence and technologies.

Environment

Eco-friendly business management has been defined as our core assignment. We should preserve the environment by minimizing the volume and amount of pollutants arising in the workplaces.

Agreement

Even from the agreement settlement stage, we should prepare our quotation and agreement in accordance with our systematic safety, healthy, environment, regulations and procedures, accident management, and emergency manuals.

Waste Management

We should train and manage our employees to handle the wastes arising from our worksites in accordance with our waste management protocol and procedure in order to prevent environmental pollution.

Maintenance

We should secure the safety of personnel and equipment through proper monitoring/maintenance inspection.

Training

Guardian puts its business management
priority on safety and environment.

Guardian is a company putting its business management priority on safety and environment. So it has systematized the education and training for safety and healthy, sexual harassment prevention, privacy protection, firefighting and emergency treatment and provided the corresponding programs on the regular basis.

The ultimate goal of these education/training programs is to develop the job skills and expertise of each member of the Company in order to provide the best quality services to our customers.
